Dear Sir/Madam:

Re: Formal Notification of an Additional Solid Waste Management Unit (SWMU)
Occidental Chemical Corporation, 6200 S. Ridge Road, Wichita, Kansas
RCRA ID #KSD007482029

Pursuant to the requirements set out by Part II of the Occidental Chemical Company's Wichita Facility Hazardous and Solid Waste Amendments Permit (RCRA ID# KSD007482029) (Permit) and the Resource Conservation and Recovery Act (RCRA), this letter provides formal notification to the United States Environmental Protection Agency (U.S. EPA) of an additional SWMU which was identified during the completion of investigative work and file review related to the Phase II On-Site Groundwater RCRA Facility Investigation (RFI).

The newly identified SWMU consists of a former hex waste quench pit, henceforth referred to as "Former Northwestern Hex Waste Quench Pit," located in a northwestern production area of the Facility. The Former Northwestern Hex Waste Quench Pit was utilized to cool and partially solidify hex wastes, which were generated from the former perchlorethylene manufacturing process (at the "Perc Plant"), prior to transportation and disposal of the solidified waste to the on-Site landfill. The Former Northwestern Hex Waste Quench Pit is located north of the former Perc Plant and southeast of the existing Chloromethanes II process area.

Additional details for the Former Northwestern Hex Waste Quench Pit are provided within the Phase II On-Site Groundwater RFI Summary Report which was submitted to the U.S. EPA in February 2014.

OCC will submit an amended Table F-1 and Figure F-1 of the Permit within 90 days of the date of this notification letter in accordance with the requirements of Section C.3 of Part II of the Permit.
